

**High performing
structural glazing specialists**

2017 Company Brochure

**Veranti Limited specialise in the design,
manufacture and installation of high
quality aluminium building envelopes
for commercial applications**

ABOUT US

Veranti Ltd is a professional commercial aluminium fenestration company.

Veranti Limited specialise in the design, manufacture and installation of high quality and high performance building envelopes, including aluminium and composite curtain walling, structural glazing, shop-fronts, doors and windows, brise soleil and louvres for commercial applications.

As the region's most respected aluminium fabricator offering a comprehensive range of solutions, we have a reputation for service, quality, delivery, manufacturing and installation of high performance architectural aluminium glazing using industry's leading profiles.

We are committed and proven in achieving strict acoustic façade requirements and thermal performance for your unique build requirements.

***leading reputation for service,
quality, delivery, manufacturing
& installation of architectural
aluminium glazing***

Our industry expertise enables a unique integrated design service offering support and advice for architectural design and crucially to implement practical solutions for effective cost savings without compromise.

Veranti's positive and dynamic approach from early concept to completion has enabled us to work on some of the most complex and award-winning projects across the South East of England.

Supporting glazing projects ranging from £10k to £1 million, we are proud to support all sectors, including commercial, education, healthcare, local government, industrial warehousing, residential and much more.

We pride ourselves on the highest levels of customer service and technical support, and through this have built long lasting and mutually beneficial relationships with our customers

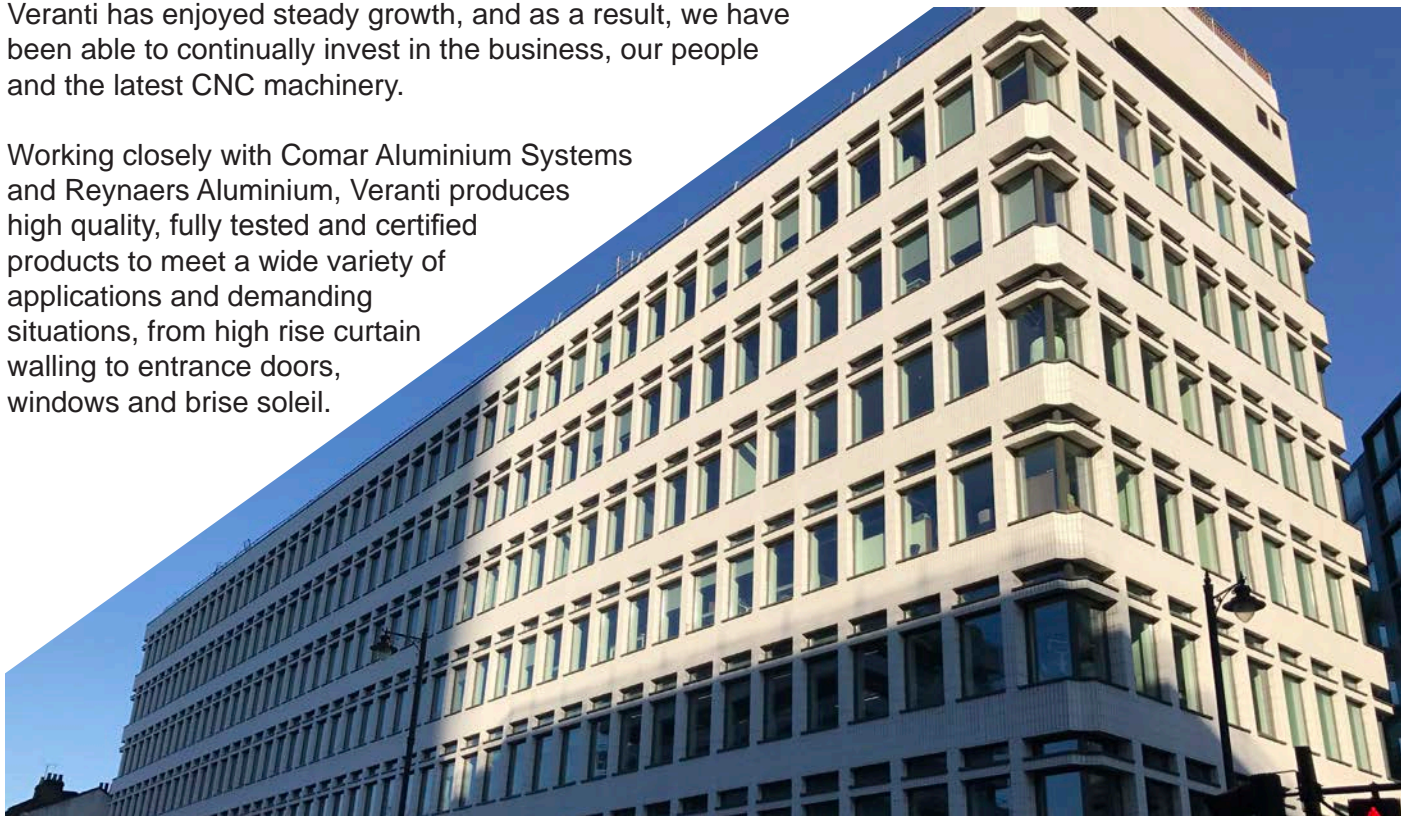

GROWTH

Sustainable growth from regular investment

Veranti has enjoyed steady growth, and as a result, we have been able to continually invest in the business, our people and the latest CNC machinery.

Working closely with Comar Aluminium Systems and Reynaers Aluminium, Veranti produces high quality, fully tested and certified products to meet a wide variety of applications and demanding situations, from high rise curtain walling to entrance doors, windows and brise soleil.

COMMITTED TO INVESTMENT

Continued success and investment has resulted in a move into a larger 12,000 sqft facility which will enable greater capacity and further additions to our range of cnc machinery and staff.

Later this year, our new facility will house our showroom to enable architects and clients to view our range of products and discuss future projects.

STANDARDS

Veranti Ltd is committed to regular audits.
ISO9001 accredited

HEALTH & SAFETY

All our key staff have been in the industry for many years and have amassed a wealth of experience in many projects and products. Our staff are regularly updated on industry changes and kept abreast of the latest H&S regulations with the assistance of our Health and Safety consultants, HCS safety.

HCS Safety undertake regular visits to our sites and issues detailed reports to enable us to evaluate and remain pro-active.

Each of our fitting teams have CSCS cards with supervisors holding SSSTS and SMSTS qualifications.

ENVIRONMENTAL COMMITMENT

Veranti Limited considers project design, engineering and management to all have a significant impact upon the environment. In order to protect and improve the environment, Veranti Limited is committed to a pro-active approach of pursuing excellence in major environmental areas.

Veranti Limited regards the delivery of sustainable development as a long term legacy to maintain and improve the quality of life. Environmental aspects play an important role from the early development and feasibility stages, through to final implementation.

In conjunction with project partners, we believe it as vital that the environmental implications are fully assessed and considered at each stage, including waste management, energy conservation, materials usage, pollution and current environmental legislation. Recyclability and sustainability are major considerations when selecting suppliers and products for example when using timber we make sure it's from a FSC or uses recycled materials, where quality is not compromised, and water based timber treatments that last for many years without the need further application.

***Constructionline member and
BS-EN ISO9001 accredited***

This commitment to environmental responsibility is present throughout the Company, and to this end we will aim to achieve BS-EN ISO14001 environmental certification.
